60-62

29 MAR 1962

25X1A

Chief of Operations, [REDACTED]

Acting Chief, Supply Division

25X1A

1. Headquarters has a requirement for 300 each of subject items of which 100 each must arrive at Station 978 on or before 23 April 1962 and the additional 200 must arrive at 978 by 30 May 1962. Requisition, voucher and shipping data will be forwarded by TWX.

2. In view of defects reported from the field and those encountered during recent tests, it is requested that a 100 percent inspection be performed on that quantity presently in stock at your Depot. Additional serviceable items will be returned from the manufacturer during the month of May.

3. The inspection is to be performed in accordance with the attached SIP, Number 4.7, with the exception that the wet phase will be eliminated. Special emphasis should be placed on the following:

25X1A

a. [REDACTED]

b. [REDACTED]

c. Components missing.

d. Presence of manufacturer's label on hair mat packing.

e. Bolt assembly on packing container excessively tight.

25X1A

5. A technical manual should be taped to the external side of each metal container.

*lighten plate  
to aid waterproofing.*
